***What if...*** Nobody littered on the beach?

That would stop one of the causes of the pollution of water. That would save the lives of hundreds of wildlife creatures! Also, would you rather be able to relax on a nice clean beach, or not be able to walk 5 feet without stepping on a bottle, can or a wrapper of some sort?

Pollution of wildlife habitats such as seas, oceans, or even the Long Island Sound is one of the biggest problems facing our community today!

Help your community today by throwing away not only your garbage, but if you see a piece of trash, just pick it up, and throw it away. And it's not just on the beach. Pollution is everywhere, on the streets, sidewalks, even if you look at your *bus stop*, I bet you would find even the littlest piece of waste! Help end the problem of pollution! If you see a piece of trash, throw it away.
