

## Slowly Destroying

The virus enters the body  
It travels through  
Infecting every inch  
It will continue  
To infect you  
Slowly destroying

Greenhouses gases  
Hover by the surface of the Earth  
They are transparent killers  
Traveling throughout the  
Atmosphere  
Slowly destroying

Realization sets it  
You search for a way  
To be rid of it  
It horrifies you  
Haunts you  
Slowly destroying

People know it is there  
The Earth is slowly rotting  
They do nothing  
Brush it off  
Like nothing  
Slowly destroying

Pollution is like a virus  
It infects the Earth  
Infiltrating every crack and rift  
Handicapping the Earth  
Preventing it from providing  
Slowly destroying
